Education

The University of British Columbia Vancouver, BC

B.A.Sc in Computer Engineering, Dean's List, Major GPA: 4.0/4.0 *Expected Completion – Jan 2023*

Experience

Service Engineer Intern May 2022 – Jul 2022

Microsoft *Redmond, WA*

- Engineered a web app, which enabled the stakeholders to manage application versions on Microsoft Virtual Desktops, utilizing ASP.NET, C#, React, HTML, CSS, TypeScript, JavaScript, Azure Cosmos DB, Coherence UI and Fluent UI; improving user experience and productivity by 83%
- Facilitated co-workers to split the existing code base, and documented the relevant process, enhancing the productivity of relevant dev teams
- Increased usability of the self-service portal web app for Microsoft Virtual Desktops by researching, discovering and documenting 13 accessibility issues; which helped the developers to apply appropriate code change quickly
- Received critical acclaim and 100% satisfaction from the leadership team for the final presentation demonstrating progress made during the internship

Software Engineer Intern Sep 2021 – Apr 2022

SAP *Vancouver, BC*

- Automated the customer support ticket creation process by using SAP's internal API, Java Spring, Vue.js, HTML, CSS, TypeScript, JavaScript, and SQL; increasing productivity and reducing cost up to 50%
- Increased test coverage of the partner application form to 86% using Java, TypeScript, JavaScript, JUnit, Jest, and Enzyme; ensuring high quality of the product
- Improved user experience by integrating functionalities in Java Spring and SQL; enabling users to quickly view application summary

Software Engineer Intern May 2021 – Aug 2021

Teradici, an HP Company *Burnaby, BC*

- Developed a desktop app to initiate remote sessions using C++, React, Electron, JavaScript, TypeScript, and Amazon Web Services (AWS) EC2 Unix/Linux system in an agile environment; satisfying 80% of customers' requirements
- Designed unit and integration tests using Python, TypeScript, JavaScript, Jest and Enzyme; improving code quality by 50%, and code coverage by 85%
- Exceeded the company's high standards of communication by regularly articulating the team's progress

Software Engineer Intern Jan 2019 – Aug 2019

Appnovation *Vancouver, BC*

- Developed a demo mobile app using Java, Android Studio, Xcode and Swift for a $7M USD contract proposal to serve Hong Kong Airport's 72M annual travellers
- Collaborated with experienced cross-disciplinary dev teams to create the corporate website using HTML, CSS and Bootstrap; reducing load time by 60%; **Website: appnovation.com**
- Implemented backend REST APIs in Node.js to enable real-time bookings for hiking instructors' mobile app

Software Engineer Intern Jun 2018 – Aug 2018

Progress Impex Ltd *Dhaka, Bangladesh*

- Developed and launched a web app for the company's car dealership using Node.js, MongoDB, Bootstrap, HTML and CSS; before the company's Q3 deadline, resulting in 50% more sales; **Website: progressmotorsltd.com**
- Analyzed customer's ambiguous problems to decipher and tailor the web app design, resulting in 80% satisfaction
- Developed a mobile app in Java and Android Studio for internal usage, increasing employee productivity by 50%
- Utilized REST APIs, DigitalOcean server and Cloudflare Content Delivery Network to scale the web app to serve over 10,000 requests per month, with each request taking under 2 seconds for optimal user experience

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript, Swift, SQL
Frameworks: Node.js, React, React Native, Bootstrap, Electron, JUnit, Jest, Enzyme
Concepts: Data Structures, Algorithms, Databases, Software Development, Programming, Problem Solving
Tools: Android Studio, Xcode, Git, Linux, HTML, CSS, MongoDB, Agile, REST API, Object-oriented Design
Theory: Mathematics, Computer Science, Algorithm Design, Complexity Analysis
